Data Scientist | Performance Marketing & Growth Analytics

PROFESSIONAL SUMMARY

2+ years of experience in A/B testing, funnel analysis, customer segmentation, and conversion optimization across large-scale digital platforms. Skilled in SQL, Python, and BI tools to design dashboards, automate reporting pipelines, and generate actionable insights for performance marketing, campaign optimization, and growth analytics. Proven ability to translate complex datasets into measurable improvements in conversion rate, retention, and revenue growth.

EXPERIENCE

Pathao Ltd.

Jan 2025 – May 2026

Graduate Data Scientist

- Designed and executed A/B experiments across product, pricing, and marketing initiatives to evaluate causal impact on conversion rate, revenue, and retention performance.
- Owned end-to-end funnel analytics systems identifying lifecycle conversion bottlenecks and optimizing acquisition, activation, and retention across multiple customer segments.
- Built and maintained 10+ dbt-based data models powering scalable performance marketing dashboards, automated reporting pipelines, and KPI tracking systems used by growth and business teams.
- Developed automated Growth & Insights dashboards reducing manual reporting workload by 20 hours per week and improving decision-making speed for marketing stakeholders.
- Created user segmentation models for 1M+ users enabling targeted marketing campaigns, lifecycle messaging, and behavioral engagement strategies.
- Built recommendation models increasing cross-sell conversion rate and improving average order value by 25%, directly contributing to marketing-driven revenue growth.
- Built SARIMAX forecasting models improving campaign demand planning accuracy and reducing order cancellations by 7%.
- Developed churn prediction models identifying high-risk users and enabling targeted retention strategies, improving customer retention by 15%.

Pathao Ltd.

May 2024 – Dec 2024

Associate Data Analyst

- Built automated performance reporting dashboards tracking core marketing, growth, and operational KPIs across business units.
- Developed onboarding funnel analysis system for 100K+ users to identify drop-off points and improve activation rates.
- Created segmentation models for 1M+ users supporting targeted communication strategies and lifecycle engagement campaigns.
- Built real-time operational analytics system improving supply-demand matching efficiency and reducing misallocation by 30%.
- Conducted funnel analysis for food delivery operations to identify conversion bottlenecks and improve system-wide performance.

BUSINESS ANALYTICS PROJECTS

- Built simulation models for product and marketing decision-making under uncertainty to evaluate feature and campaign feasibility.
- Conducted pricing optimization analysis evaluating revenue vs conversion trade-offs for delivery fee strategies and promotional campaigns.
- Analyzed operational efficiency of long-distance deliveries, reducing wasteful demand and improving cost efficiency by 5%.

SKILLS

Programming:	SQL, Python
Business Analytics:	KPI Reporting, Funnel Analysis, Segmentation, A/B Testing, Experimentation
Modeling:	Forecasting (SARIMAX), Regression, Churn Modeling
BI Tools:	Tableau, Looker Studio, Power BI
Data Engineering:	dbt, BigQuery, Data Modeling

EDUCATION

Bangladesh University of Professionals

B.Sc. Information & Communication Engineering

2020 – 2023

CGPA: 3.89/4.00

AWARDS

- Dean's Appreciation Award
- Champion – Tech Carnival 1.0 (CUET)
- 1st Runner-Up – Inter-university Case Competition (IUT)
